TECHNICAL SKILLS

(in order of proficiency)

Languages: Java, JavaScript, HTML/CSS, PHP, Python, Ruby

Technologies: Node.js, AngularJS, Gradle, jQuery, *nix, Maven, Git, Vim, MySQL, MongoDB, L^AT_EX, Redis

EXPERIENCE

Software Developer Intern

June 2014 – Present

Oakwood Software

- Developed an AJAX file upload system using jQuery and PHP, replacing a 10-year-old legacy system

Bukkit Developer

June 2011 – September 2014

Bireosoft

- Created scalable modifications for various Minecraft servers with thousands of players, including Vox Populi, GTAHub, and New Liberty
- Reverse engineered obfuscated Java via reflection and a decompiler, enabling previously impossible game features

Webmaster

2006 – 2012

M & R Consulting Services, Inc.

- Created a denial management workflow system to handle sourced appeals for denied cases
- Used PHP, MySQL, and HTML/CSS

PROJECTS

Syncsp.in

September 2014

- Realtime social jukebox application built on top of the Beats Music API
- Uses accelerometer of connected web clients to produce visualizations
- Written using AngularJS, Socket.io, and Node

TripBlaze

June 2014

- Trip planning web application
- Reverse engineered the Tripomatic API to get data for points of interest
- Won the category and grand prizes at the Sabre Dev Studio Hackathon
- Utilized AngularJS, Node, MongoDB, and Express
